

Faculty Development Program

It endeavours to provide education and training of consistently high standards through innovative and versatile programmes suitable for the current and emerging needs of the community.

The schedule for the training programme will be fixed based on the number of participants expected from each college, for each programme a minimum of 25 participants is necessary

Training Objectives:

- a) Provide state-of-the-art knowledge in renewable energy technologies
- b) Teach the skills needed to manage innovation and entrepreneurship in the renewable energy sector
- c) Deliver a strong working knowledge of project management through a collective project
